Problem: Enable ECS Assist in the mini-DAAC to support the test installation of the system using ECS Assist for Drop 4P.																					
Proposed Solution: ECS Assist will be run from Clearcase for the testing. The only file which needs to be installed in the mini-DAAC is .sitemap. This file resides in Clearcase under the shared view rmagill_ea4p, in /ecs/formal/ COMMON. A copy of the file needs to be placed in the mini-DAAC under /tools/common/data/ea. To limit visibility of the file, it should be owned by cmts3, with file privileges of 640. In this way visibility of the file is limited to the ts3 mode.
